EDUCATION

University of Waterloo

Waterloo, ON

Honours Bachelor of Computer Science

EXPERIENCE

Senior Coding Instructor

Jun. 2025 – Present

University of Toronto Scarborough

Toronto, Ontario

- Engineered interactive digital tools in coding **workshops** using **Python and Scratch**, empowering over **300 children** to acquire foundational **programming** skills while ensuring clear communication for large projects
- Implemented interactive teaching games and digital tools that increased student **participation by 40%**, fostering a deeper understanding of complex technological concepts.

Computer & Robotics Instructor

Feb. 2026 – Apr. 2026

MakerKids

Toronto, ON

- Taught multiple groups of **15+ students** to proficiency in **coding & robotics** from **grades 1-8** afterschool through in-person interactive lessons
- Designed **engaging lesson plans** and provided **individualized support** to ensure students developed a strong understanding of complex concepts in Scratch, Python, Arduino and Minecraft.
- Managed **classroom logistics and equipment inventory** for multiple concurrent sessions, ensuring 100% resource availability for projects.

Lead Web Developer

Jun. 2024 – Sept. 2024

SproutHacks

Waterloo, Ontario

- Spearheaded a responsive webapp & authentication system alongside **UI/UX** design to ship MVP/final product utilized by **100s of users** leveraging **React, Tailwind CSS, and TypeScript**
- Integrated REST APIs & Firebase for real-time updates; was **one of two lead developers**.

PERSONAL PROJECTS

StudyQuest iOS App: Developed a gamified learning app with an XP and leaderboard system, refining UI/UX through A/B testing. Built with **React Native, Expo, and Firebase**; implemented authentication, real-time progress tracking, and a study analytics dashboard.

Voca: Engineered an interactive vocal processor and pitch-training platform built with **React, Typescript & TailwindCSS** alongside **Mediapipe & Tone.js**. It utilizes real-time hand-tracking (**computer vision**) to modulate audio effects while leveraging autocorrelation algorithms for live pitch detection and gamified feedback.

TECHNICAL SKILLS

Languages: Python, C++, C#, Lua, HTML/CSS, JavaScript/TypeScript

Frameworks: PyTorch, SciKitLearn, NumPy, Pandas, Pygame, React Native, React.js, Node.js, Docker

Tools: Git/GitHub, CI/CD Pipelines, PostgreSQL, MongoDB

Soft Skills: Collaboration, Public Speaking, Problem-Solving, Mentorship

AWARDS

GenZCanHack – Created a carbon emissions tracker using an ESP32 microcontroller and MPU6050 sensor with a **Node.js** backend. **Placed 4/48**.

University of Toronto High School Design Competition – Solved a first-year engineering problem during the 11th grade with a dynamic team of 4. **Placed 5/30** within our division.
